List comprehension

```
[exp   for x in iterable     if condition  ]
[x**2  for x in range(10)    if x % 2==0   ]

[exp   for x in iterable    if condition1 if condition2 ...]
[x     for x in range(10)    if num % 2 == 0 if num > 5]

[exp1  if cond  else  exp2 if cond  else exp3 for x in iterable]
[x**2  if x<5   else  x//2 if x>5   else x    for x in iterable]
```

Dict comprehension

```
{key_exp: value_exp for x in iterable     if condition }
{x      : x**2      for x in Range(10)    if x % 2 == 0}
```

Syntax of lambda function

```
lambda arguments : expression
lambda a         : a+10

lambda arguments : trueValue  if cond1  else  falseValue
lambda x,y       : x          if x<y    else  y
```
